

# EPTa & EPTc

## Euro NCAP Pedestrian Target

Safer Mobility.

The officially Euro NCAP certified targets were developed under the premise of high everyday suitability for quick and easy use on the proving ground. They combine all relevant worldwide requirements of test equipment for Active Safety Testing. With their size, shape, realistic sensor signature and leg movement, the targets meet the Euro NCAP specifications as well as the ISO 19206-2 standard that applies to numerous other global protocols.

## Articulated Pedestrian Targets

### Euro NCAP Pedestrian Target (EPTa & EPTc)

- Collision-proof design – crash speed up to 60 km/h
- Magnetic coupling for easy reassembly after a crash
- Realistic response for Radar-, Lidar-, Camera- and IR-Systems
- Simple program selection: gait speed of three, five and eight km/h for adult dummy
- Compatible with all common carrier systems
- Articulated legs with realistic Micro-Doppler
- Easy operation, intuitive software control via a web app
- Automatic IMU motion trigger for activating the movement
- Lightweight and soft structure
- Euro NCAP certified
