

MESSRING expands its portfolio with acceleration sled testing services

Customer-oriented testing services at the Gilching facility / Compact Impact Sled including data acquisition, lighting and individual support

Munich, Juli 11th – MESSRING GmbH, a leading company in the field of crash test technology, announces that they are extending their service offering to include testing services on the CIS (Compact Impact Sled). This additional offering marks a further element for the company, which is continuously strengthening its position as a provider of high-quality and holistic vehicle safety solutions.

The CIS sled system enables a variety of component tests in a flexible and wide range of applications. Thanks to short test cycle times and the availability of all equipment in-house - including data acquisition, high-performance LED lighting and high-speed camera systems - MESSRING offers a one-stop solution tailored to customer requirements.

" The CIS testing service is characterized by its flexibility, availability, and technical expertise," says Florian Lenz, CEO at MESSRING. "Our qualified and experienced team is on hand to provide our customers with comprehensive support for individual or standard tests, from consulting to setup and documentation. The ISO 9001 and DAkkS certifications for our measuring equipment additionally underline our quality commitment."

The initial interest in expanding the business area resulted from the desire to better understand the needs of customers and to incorporate these into the further development of MESSRING's products and services. In addition, customers will be offered the opportunity to continue carrying out tests while their own systems are under maintenance. With the move to the new company building in 2020 and the associated expanded facilities, the framework conditions were also in place to introduce this service.

For more information about MESSRING's new testing services and how they are contributing to product development and Safer Mobility, please visit our website at [„messring.de – Testing Services“](https://www.messring.de – Testing Services) or contact us directly via sales@messring.de.
