

EPTa & EPTc

Euro NCAP Pedestrian Target

MESSRING

Safer Mobility.

The officially Euro NCAP certified targets were developed under the premise of high everyday suitability for quick and easy use on the proving ground. They combine all relevant worldwide requirements of test equipment for Active Safety Testing. With their size, shape, realistic sensor signature and leg movement, the targets meet the Euro NCAP specifications as well as the ISO 19206-2 standard that applies to numerous other global protocols.
